

AHMED REDA ELBAZ

Full Stack Net Developer

✉ a7med.reda01@gmail.com ☎ (20)-01148472670 📍 Mansoura, EG 🌐 github.com/a7medreda01

SUMMARY

Software Developer with experience in building web applications using .NET, SQL, and modern frontend technologies.

Passionate about developing scalable solutions and delivering high-quality projects. Looking to contribute to a dynamic development team.

EDUCATION

Mansoura University, 2019 – 2023
Bachelor, Computer and Information Science

INTERNSHIP

Full stack Developer, 09/2025 – 03/2026 | Damite, EG
Intensive Training Program (ITP) Damite, EG
- DotNET Full stack .NET with Angular Development. Certification from Information Technology Institute (ITI).

PROJECTS

Affiliate Marketing Platform | Full-Stack Web Application, *Developed a multi-role affiliate marketing platform connecting merchants with marketers to manage product promotion, orders, commissions, and sales tracking.*

Key Features:

- Multi-dashboard system (Admin, Merchant, Marketer)
- Product management, order tracking & commission system
- Wallet & withdrawal management
- AI-assisted marketing content and product recommendations

Technical Stack:

- **Backend:** ASP.NET Core Web API using **3-Tier Architecture**, Entity Framework Core, SQL Server, JWT Authentication, Repository Pattern
 - **Frontend:** **Angular** with Reactive Forms, Route Guards, Lazy Loading, and responsive UI
- Technologies: ASP.NET Core, C#, Angular, SQL Server, Entity Framework Core, JWT, REST API, Git/ GitHub

E-Commerce Platform | Full-Stack Web Application, *Developed a scalable full-stack e-commerce system using 3-Tier Architecture to ensure clean separation of concerns, maintainability, and extensibility.*

Backend: .NET Web API, SQL Server, Entity Framework Core, JWT Authentication, 3-Tier Architecture, RESTful APIs

Frontend: Angular, TypeScript, Reactive Forms, HTTP Client, Routing & Guards, Responsive UI
Backend repo [🔗](#) : Frontend repo [🔗](#)

Tripster Hotel Booking Platform

- Utilized Entity Framework, Repository Pattern, Unit of Work, LINQ, and SOLID principles.
- Built a scalable hotel booking platform using ASP.NET MVC with N-Tier Architecture.

- Implemented authentication, advanced search & filtering, booking management, and pagination.
- Developed Admin Dashboard with full CRUD operations and role-based access control.

Repo [git](#) 

News website ASP.NET MVC

- Built a web application to understand MVC architecture using ASP.NET MVC, SQL Server, Entity Framework, LINQ, Bootstrap
- Developed Controllers, Models, and Razor Views.
- Performed database operations using Entity Framework.
- Applied basic CRUD operations and dynamic page rendering.

Repo [git](#) 

Music website

- Developed a responsive fan website for the artist Amr Diab using,Technologies: HTML5, CSS3, Bootstrap, JavaScript, Local Storage .
- Implemented audio and video players to display music and media content.
- Used Local Storage to store user preferences and improve user experience.
- Designed a responsive UI compatible with different screen sizes.
